

Protect your on-premise servers

Housed exclusively in Canada

Our cloud portfolio is designed to offer an affordable and reliable monthly way for businesses to host and protect critical systems and information.

SOLUTION ARCHITECTURE

How it works

ENTERPRISE INFRASTRUCTURE

Backed by datacenters featuring PCI DSS, ISAE 3402 Type II, SSAE 16 Type II, and CSAE 3416 Type II certifications. Your information is protected by fire suppression, backup generators, security guards, line conditioning, and redundant cooling.

POWERFUL, BUILT-TO-SCALE

Designed using lightning fast SSD storage, Xeon processing, and 10 Gigabyt network infrastructure, our systems are designed to support your business as it grows with flexible resources.

RELIABLE AND REDUNDANT

To reduce the risk of downtime, Ideal cloudIT is built using N+1 redundancy to provide high availability and automatic failover. We back our services with a 99.9% uptime guarantee.

CLOUD SERVERS & MICROSOFT AZURE

Private Windows and Linux servers with adjustable (CPU, RAM, Storage) that can be used to house your services and data.

OFFSITE BACKUP AND DISASTER SUPPORT

Designed using lightning fast SSD storage, Xeon processing, and 10 Gigabyt network infrastructure, our systems are designed to support your business as it grows with flexible resources.
