

Real-time technology management

We support, design and host your IT infrastructure.

Real-time technology management, fully integrated into your business to proactively protect, manage, monitor, maintain, and support.

SOLUTION ARCHITECTURE

How it works

24/7 MONITORING

Real-time site, equipment, and user tracking by our Network Operations Center to keep your team online, safe and productive.

ASSET MANAGEMENT

Active equipment and software tracking (make, model, serial number, warranty, license keys, assigned to, etc.).

A DEDICATED TEAM

You can rely on our full team of experienced IT pros for everything from simple requests to major projects.

PREVENTATIVE SYSTEM MAINTENANCE

On-going updates and patching to software and equipment that provides the highest levels of security and stability.

RANSOMWARE AND AV PROTECTION

Advanced threat protection for all computers and servers that is monitored by our Network Operations Center.

ANNUAL BUDGETING AND ASSESSMENT

Annual review that includes hundreds of checks, fiscal recommendations, and 12-month hardware rotation schedule.

TECHNOLOGY MANAGEMENT

Tracking Equipment, licensing, and how much to spend each year can be challenging. We include an annual technology assessment 3-months in advance of your fiscal year end.

SECURITY FIRST

Your information is priceless and should never be exposed!

END-TO-END ACCOUNTABILITY

The ManageIT experience is given our highest attention. We aggressively track and analyze all requests.
